REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitation(s) of "...a magnetic body disposed inside said liquid container section so as to move in a vertical direction...a line member tying said figure object with said magnetic body so as to transmit pulling forces between said figure object and said magnetic body...wherein when said electromagnetic mechanism is energized said magnetic body is caused to move downwardly by means of a magnet force caused between said electromagnetic mechanism and the magnet body and said figure object is caused to move downwardly against the buoyancy force working on aid figure object together with the downward movement of the magnet body..." are not anticipated or made obvious by the prior art of record in the examiner's opinion. For example, Lin (US Patent No. 6,148,770) teaches an ornamental device having a figure (10) with an imbedded magnet (12) that is attached to a pull string (110) having a down leading member (11). An electromagnet (24) provides an on-off magnetic force. However, the prior art fails to teach "...a magnetic body disposed inside said liquid container section so as to move in a vertical direction...a line member tying said figure object with said magnetic body so as to transmit pulling forces between said figure object and said magnetic body...wherein when said electromagnetic mechanism is energized said magnetic body is caused to move downwardly by means of a magnet force caused between said electromagnetic mechanism and the magnet body and said figure object is caused to move downwardly against the buoyancy force working on aid figure object together with the downward movement of the magnet body..."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
